

“Linking Students With Success”

Our Philosophy

We believe all children can and will learn

We believe the relationship between the teacher and the learner requires a commitment

We believe that the school should actively develop a partnership involving parents and the community. The purpose of the partnership is to help insure the learner achieve success.

We believe the school should provide equal opportunity for students to develop their individual potential regardless of disability, race, sex, and/or socio-economic background.

We believe parents, the school, and the community must impart to students a system of moral standards and beliefs allowing them to function in a democratic society.

Essential Learning and Indicators of Success

North Iowa students will be successful communicators.

Successful communicators:

- ◆ Express needs and ideas so others understand,
 - ◆ Interpret experiences,
 - ◆ Evaluates and analyzes information,
 - ◆ Listens and perceives information from others.
- to learning by all parties involved.

North Iowa students will use good problem solving skills. Good problem solvers:

- ◆ Apply skills to real life situations,
- ◆ Learn from the past,
- ◆ Use a variety of appropriate technology,
- ◆ Demonstrates appropriate risk taking,
